About the Faculty

The history of our university dates back to 1581. The university is one of the largest centres of learning in Hungary. It has been a research university since 2010 and was awarded with the title of "outstanding higher educational institution" in 2013. The Faculty of Medicine has made a considerable contribution to these achievements. Our Medical Programme was accredited as a "Programme of Excellence" by the Hungarian Accreditation Board in 2006, a title we have been holding since then. Apart from being acknowledged in Europe, the medical degree issued by this university has been granted a full academic accreditation by the State Medical Boards of California and New York, in the US. Admitted students are studying at a university where Albert Szent-Györgyi was both dean and rector. He was the scientist who was awarded with the Nobel Prize in 1937 for physiological research which he conducted at the University of Szeged. The clinics at the Faculty serve as national and regional centres for a number of medical specialties. Patient care is co-ordinated by the Albert Szent-Györgyi Medical Centre. In-patient care is available for 1.800 patients, thus providing an appropriate practical resource for high-quality medical education. In recent years, our facilities have undergone significant improvements: We have built the most modern clinical building in the country to house all fields of surgical care, as well as cardiology, neurology and haematology.

Due to its educational, research, and patient care activity, the Faculty of Medicine is the largest of the university's twelve faculties. Nearly 1.200 students are enrolled in the Hungarian-language programme, and a similar number of students attend the English and German language programmes.

Besides the graduate programmes, we place great emphasis on post-graduate training. The Faculty runs 4 doctoral schools featuring 16 PhD programmes with nearly 150 Hungarian and international students. Students are afforded the opportunity to enter PhD programmes during the last year of their graduate studies.

Why choose us?

1. Excellent education at a distinguished institution
2. University campus situated in the heart of the city
3. Szeged – "the city of sunshine" as an ideal place to live and study
4. Multicultural environment
5. Rich social and cultural life
6. Be part of the faculties where outstanding discoveries are made
7. Valuable degrees
8. Prestigious place in university rankings
9. "Green" university

List of Available Programmes for International Students:

Programmes in English language:

- Doctor of Medicine (MD) six-year undivided Master's programme
- Foundation Year

Programmes in German language:

- Two-year Pre-clinical Programme
- Foundation Year

Doctoral Schools of the Faculty:

- Clinical Medicine (PhD)
- Interdisciplinary Sciences (PhD)
- Multidisciplinary Medical Sciences (PhD)
- Theoretical Medicine (PhD)

Doctor of Medicine Programme (MD) six-year, undivided programme

The Medical Programme covers six years, that is, 12 semesters. The first two years as the foundation of basic medical knowledge. From the third year theoretical training is extended with regular clinical practice, where students intensively take part in the work of the clinical departments and the teaching hospitals. The Faculty's excellent scientific laboratories offer students a wide range of opportunities to join high standard scientific research activities. In the last two semesters – the clerkship year – students perform clinical rotations of 40 weeks. At the conclusion of the programme (State Board Examination) the title Doctor of Medicine (medical doctor; Dr. Med.) is granted for those who have met all the requirements of the training.

Foundation Year

The course is organized for students who feel unprepared for the regular health-science degree programmes or who need help in reviewing basic sciences in English language to prepare for the entrance examination of the degree programmes. The completion of the course highly increases the chances of being admitted to the degree programmes. Subjects taught are Biology, Chemistry including Chemical Calculations, Physics, Mathematics, Medical English and Hungarian language. The duration of the course is eight months, starting in October. Progress is checked on a regular basis. The language of the course is English; therefore, applicants must provide suitable proof that they meet the English language requirement for the Foundation Year Programme.

Application Requirements in General

Applicants need to apply online. See the details of the entry requirements at the given programme description of the online application platform at <https://apply.u-szeged.hu>
