Without a referral, the Insured will have to pay the medical bill (pre-payment obligation).

4. Submitting invoices for services prepaid by the insured and their payment

The costs of medical/healthcare services provided or arranged for by the designated healthcare provider do not need to be prepaid by the insured

If the insured is treated in a medical facility other than the designated medical facility the designated healthcare provider shall be notified or informed (by the insured or by the medical facility providing medical treatment to the insured) of the name of the medical facility where the insured receives/received medical care and of the medical condition that is/was treated, to allow that the designated healthcare provider may contact the treating physicians, medical facility or healthcare provider.

If the condition of the insured only allows him/her to warn the treating health care service provider of the above obligation to supply information, then the insured shall not delay to do so, as it may help the insured to receive earlier and better treatment. The reverse side of the Health Insurance Card contains important information for the treating medical institution.

If the insured receives medical treatment in an emergency at a medical facility other than the designated service provider, or without the management of the designated service provider, the insured is not required to prepay for such medical care.

The claim for the reimbursement of medical expenses prepaid by the insured must be accompanied by the following documents:

- a) the original invoice on the delivered medical treatment (health care services) issued on the last day of such treatment, or the original invoice on the purchase of medications or durable medical equipment on prescription by the treating physician requested in the pharmacy, showing the name of the insured (as well as the card number),
- b) a copy of all medical documents related to the insured event (e.g.: outpatient records, hospital discharge summary, examination records, nursing and care documentation, test findings, laboratory records, images made during diagnostic or histology tests, prescriptions, referrals, etc.) including all related precedence medical documentation and the documents produced during the first medical treatment.

A separate document with the insured's Hungarian (HUF) bank account number (signed and dated) is required to be submitted so that the insurance company can reimburse the prepaid medical expenses as soon as possible – net of the applicable deductible, subject to the benefit limit, and on condition that the claim is approved – by wire transfer to the insured's bank account.

If the claim is grounded, the insurance company shall reimburse the prepaid medical expenses in domestic currency (HUF) within 15 days upon receipt of all documents necessary for the assessment of the claim.
