

**SZTE** UNIVERSITY  
OF SZEGED

Albert Szent-Györgyi  
Medical School  
**UNIVERSITY OF SZEGED**

## ABOUT THE FACULTY

One of the most beautiful professions is healing patients and saving human lives. At our institution we strive to train highly qualified professionals. Our Faculty has a long-standing tradition of excellence in research and teaching. Our Nobel laureate Albert Szent-Györgyi received the Nobel Prize for his scientific work related to the isolation of vitamin C from Szeged paprika, a research carried out at the University of Szeged.

Due to its educational, research, and patient care activity, the Faculty of Medicine is the largest of the university's twelve faculties. Medical education is offered in three languages: Hungarian, English and German. The clinics at the Faculty serve as national and regional centres for a number of medical specialties, providing an appropriate practical resource for high-quality medical education. In recent years, our facilities have undergone significant infrastructural improvements, a state-of-the-art clinical building to house all fields of surgical care, as well as cardiology, neurology and haematology has been built. The Faculty runs 3 doctoral schools featuring 16 PhD programs with nearly 150 Hungarian and international students. Students are offered the opportunity to enter PhD programs during the last year of their graduate studies.

## WHY CHOOSE US?

1. Excellent education at a distinguished institution
2. University campus situated in the heart of the city
3. Szeged – “the city of sunshine” as an ideal place to live and study
4. Multicultural environment
5. Rich social and cultural life
6. Be part of the faculties where outstanding discoveries are made
7. Valuable degrees
8. Prestigious place in university rankings
9. “Green” university

**Our departments**

## AVAILABLE PROGRAMS FOR INTERNATIONAL STUDENTS

### Programs in English language:

Doctor of Medicine (MD) six-year undivided  
Master's program  
Foundation Year

### Programs in German language:

Doctor of Medicine (MD) six-year undivided  
Master's program

### Doctoral Schools of the Faculty:

Clinical Medicine (PHD)  
Experimental and Preventive Medicine (PHD)  
Multidisciplinary Medical Sciences (PHD)

## DOCTOR OF MEDICINE PROGRAM (MD) SIX-YEAR, UNDIVIDED PROGRAM

The Medical Program covers six years, that is, **12 semesters**. The first two years serve as the foundation of basic medical knowledge. From the third year theoretical training is extended with regular clinical practice, where students intensively take part in the work of the clinical departments and the teaching hospitals. In the last two semesters – the clerkship year – students perform clinical rotations of 40 weeks. More information:

<http://www.med.u-szeged.hu/fs/medical-program/medical-program-181025>

## FOUNDATION YEAR

The course is organized for students who feel unprepared for the regular health-science degree programs or who need help in reviewing basic sciences in English language. Students with outstanding academic achievements have a high chance to be admitted automatically to the Health Science degree programs. For more details please go to <https://www.med.u-szeged.hu/fs/general-information/foundationyear>

## STUDENT LIFE AT THE FACULTY

International students are invited to take part in a diverse and enriching selection of extracurricular activities throughout the semester. Many of these- including sports events, film nights, concerts, the International Cultural Evening (ICE)- are organized by the International Student Union of the Faculty (ISUS), helping students connect, relax, and enjoy campus life. Szeged offers more than academic excellence—it's a welcoming, dynamic environment where students can grow both personally and professionally.
